Summary

BE. **Information Science** undergraduate at NIE Mysore and **Software Engineering** enthusiast with hands on experience in **Full-Stack** Development and building production ready web applications. Proficient in the **MERN Stack, JavaScript, and Data Structures & Algorithms**, with experience in developing secure, scalable, and user **centric solutions**.

Education

The National Institute of Engineering, Mysuru 2024 – 2028
B.E. in Information Science and Engineering
• *CGPA: 9.2*

Experience

Freelance Web Developer - Mysuru, Karnataka Jan 2026 - Current
• Developed **responsive and scalable web applications** for clients using modern **full-stack (MERN Stack)** technologies.
• Collaborated directly with clients to gather requirements and deliver customized software solutions.

Positions of Responsibility

Technical Core Member, The BYTE Club NIE Mar 2026 - Current
• Mentored Guided and 100+ students in technical workshops, projects, and club activities.
• Organized and conducted technical events and workshops, ensuring smooth execution.
Event Management Core Member, The ONYX E-Cell NIE Nov 2025 – Current
• Coordinated and guided 100+ students during entrepreneurship focused events and activities.
• Coordinated with team members and stakeholders to ensure smooth event execution.

Projects

NIE Summit – Github – React.js, Node.js, Express.js, MongoDB, JWT Authentication
• Developed a full-stack web platform that **enables college clubs to manage events, recruitment drives**, announcements, and member information from a **single dashboard**.
• Built features for **event registration and recruitment** applications, **allowing students to apply** for club activities and positions online.
• Implemented secure JWT-based authentication and **role-based access** control for students, club members, and administrators.
Carbon Sense – Github – HTML, CSS, JavaScript, Machine Learning, Fast API, LLM
• Developed Carbon Sense, a web application that analyzes **uploaded CSV datasets to calculate CO₂, NO₂, and SO₂** emissions using data processing techniques.
• Integrated automated parsing and **real time emission computation** for accurate environmental impact assessment.

Technical Skills

Programming Languages: JavaScript, Python, Java, C, C++
Web Development: HTML, CSS, ReactJS, NodeJS, ExpressJS
Core Subjects: Operating Systems, Database Management System, OOPS
Libraries: NumPy, Pandas, Matplotlib
Other Fundamentals: MySQL, MongoDB, Linux, Git
